

## Fitting your Timber Blinds

What you will need.

1. Tape Measure and pencil
2. Appropriate Screws & Wall Anchors depending on what you are fixing too (not provided)
3. Cordless Drill / Screwdriver

<p><b>Instructions for Reveal Fit</b></p> <p><b>Step 1</b></p> <p>Hold end cap into left side of reveal as shown. End caps are marked Left (L) and Right (R). If possible, mount cap 10mm in from front of reveal edge, screw into place.</p>	
<p><b>Step 2</b></p> <p>Repeat this process on the right corner of reveal</p>	
<p><b>Step 3</b></p> <p>Push pelmet bracket clips onto the top of the head box. Check spacing on the back of the pelmet for ideal locations.</p>	

**Step 4**

Insert blind into end cap, keeping thumb between top slat and head box to avoid trapping slat in end cap.

**Step 5**

Clip end cap locks down until they "Click"

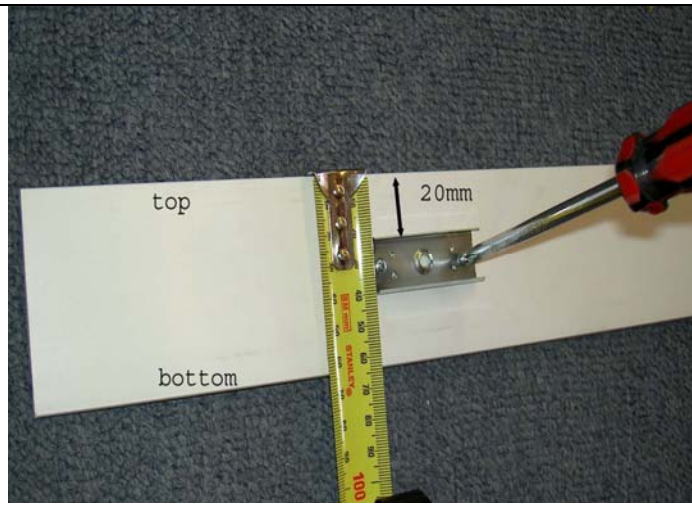

**Step 6**

Hold pelmet up to blind to work out spacing of the pelmet brackets. Mark the pelmet with a pencil as to where the clips are hooked onto the headbox. From these markings you can screw the other half of the bracket to the pelmet.

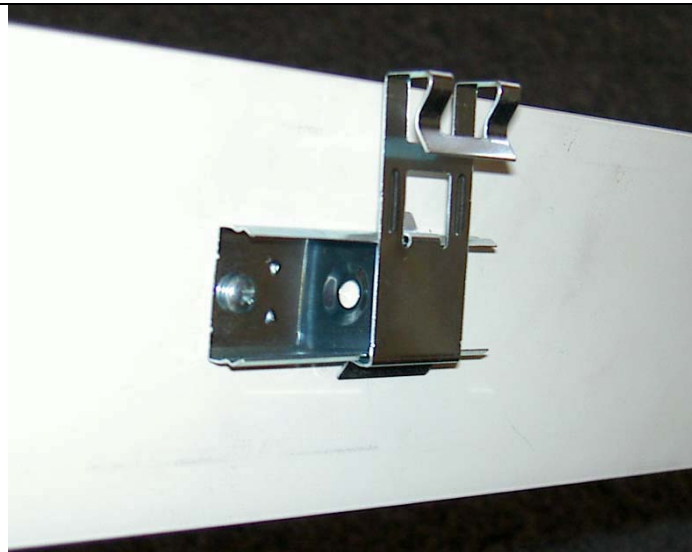

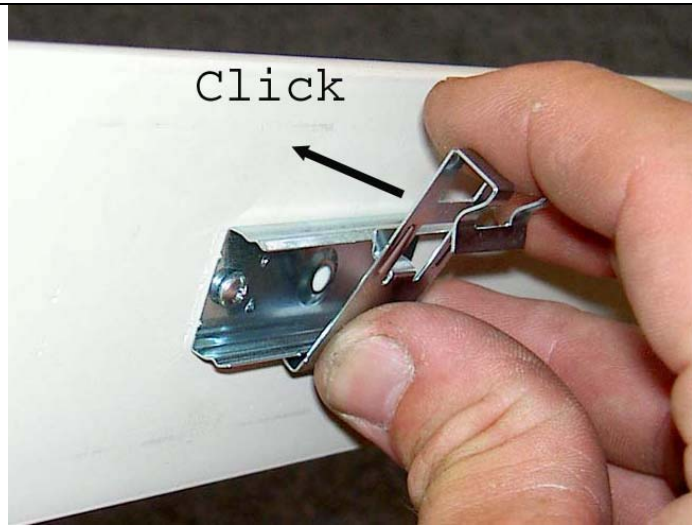

**Step 7**

After you have marked where the pelmet brackets go, measure 20mm from top of the pelmet and screw to the pelmet.

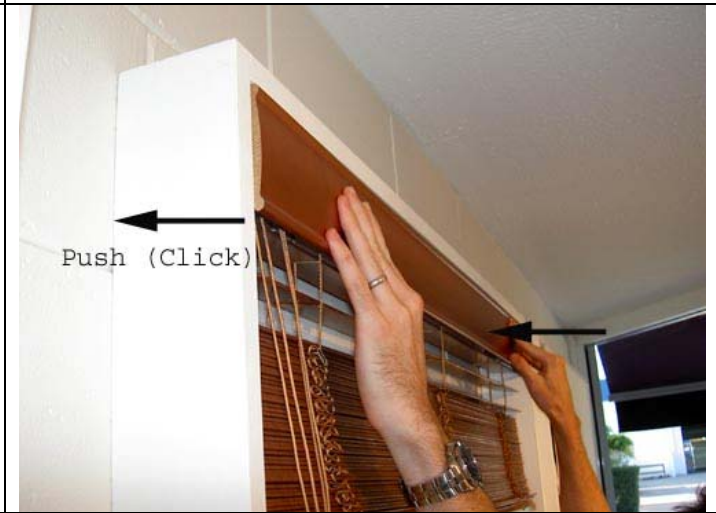

**Step 8**

For reference. This is how the pelmet clips work.

<p><b>Step 9</b></p> <p>Align the pelmet brackets with the clips on the metal head box. Push up first to engage the top of the underside of the clip with the pelmet bracket.</p>	
---	---

<p><b>Step 10</b></p> <p>Push flat until the clips "Click" together.</p> <p>If you need to take off the pelmet do the opposite and gently lever with your thumbs the pelmet from the bottom side.</p>	
---	---

***Face Fit***

<p><b>Step 1</b></p> <p>Is the same process as reveal just mount the blind as shown.</p>
